AI learned to fake evidence.
Vouch learned to catch it.

Vouch is a visual verification layer for companies that approve or reject claims based on images. It detects manipulation, AI-generated images and photos recycled from the internet in seconds, from Vouch Web or via API.

LAYER 01

AI and manipulation detection

A heat map of what isn't real: generated or edited textures, reflections, edges and lighting, plus the file's forensic metadata.

LAYER 02

Reverse search

We trace the image across search engines, social networks and marketplaces to find out whether it was reused or taken out of context.

LAYER 03

Behavior and context

We cross-check the customer's history and whether the image makes sense for what's being claimed.

THE RESULT

Risk score 0–100

The higher the score, the more likely the image was generated or manipulated with AI. Every verdict shows what was detected, where and why: context, not just a probability. If the case is a gray area, a Vouch specialist steps in.

0 · Approve Review 100 · Reject

INPUT

Vouch Web

Your team uploads the image and the customer's email. No integration needed: history, metrics, reports and traceability from day one.

INPUT

API REST

Your system sends the image to `POST /v1/analyze` and gets the result back as JSON. Compatible with any stack; a typical integration takes 1 to 3 days.

< 30 s
for all three layers; most under 15 s

JPG · PNG · WEBP
up to 10 MB per file

Encrypted
images are never shared with third parties

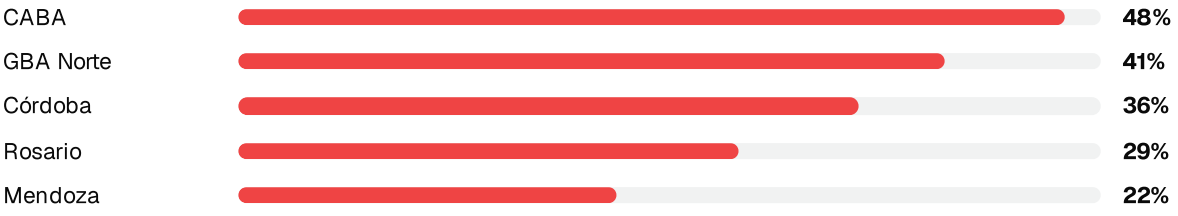

This is what a Vouch report looks like.

Auditable reports by period, region and segment, ready for regulators, legal teams and internal audits. The figures on this page are sample data.

PERIOD AUGUST 2026 · DELIVERY

SAMPLE DATA

707	304	43%	21
Analyzed	Frauds	Fraud rate	Pending review

DATE	ID	VERDICT	SCORE	LAYER THAT FLAGGED	HUMAN REVIEW
08/28 09:10	VCH-8821	Rejected	97	AI detection	Confirmed fraud
08/25 09:00	VCH-8790	Approved	10	—	—
08/24 15:16	VCH-8774	Approved	6	—	—
08/24 11:19	VCH-8769	Suspicious	58	Context	Under review
08/18 13:22	VCH-8702	Rejected	94	Reverse search	Confirmed fraud

Full traceability. Every analysis records what was detected, how, when and who reviewed it, with a unique ID. Evidence ready for disputes.
